KRISHNA KUMAR

QA ENGINEER — SOFTWARE TESTER

+91 9771568124 — Krishna91kavi@gmail.com — Bangalore, India

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience in manual and automation testing, currently working on a healthcare application in an Agile environment. Experienced in functional, regression, integration, end-to-end, API, frontend, backend, UI/UX, responsive, and cross-browser testing. Identified and reported **1,500+ defects** across **14 Agile sprints**, including major and minor functional issues across frontend, backend, application workflows, and Figma design validation. Proficient in Selenium, Postman, JIRA, Git/GitHub, SQL, SDLC/STLC, and Agile/Scrum practices, with a strong focus on test coverage, defect prevention, and delivering reliable, high-quality software.

CORE QA SKILLS

- Manual Testing
- Functional Testing
- Integration Testing
- Exploratory Testing
- UI/UX Testing
- Cross-Browser Testing
- Test Case Design & Execution
- Selenium WebDriver
- Postman / REST API Testing
- JSON Validation
- JIRA
- Chrome DevTools
- SDLC / STLC
- Defect Lifecycle
- Java Fundamentals
- Automation Testing
- Regression Testing
- End-to-End Testing
- Smoke / Sanity Testing
- Responsive Testing
- Boundary Value Analysis
- Defect Tracking & Reporting
- Playwright (Hands-on Practice)
- HTTP Methods / Status Codes
- SQL for QA Data Validation
- Git / GitHub
- JMeter Fundamentals
- Agile / Scrum
- Test Documentation
- Python Fundamentals

PROFESSIONAL EXPERIENCE

Quality Analyst — **Eastencher Software Private Limited**

Bangalore — Jun 2026 – Present

- Working on a healthcare project, performing both manual and automation testing across multiple application modules and user workflows.
- Designed, executed, and maintained test cases covering functional, regression, integration, UI/UX, end-to-end, and exploratory testing scenarios.
- Identified and reported 1,500+ defects across frontend, backend, UI/UX, and Figma designs over 14 Agile sprints.
- Identified both minor and major functional defects, including workflow, validation, usability, UI, and backend-related issues.
- Performed frontend testing to validate user workflows, field validations, business rules, responsiveness, and cross-browser compatibility.
- Performed backend and API validation to verify data flow, API responses, status codes, request/response payloads, and integration behavior.
- Reviewed Figma designs and performed UI/UX validation to identify discrepancies between design specifications and implemented application screens.
- Executed regression testing after defect fixes to ensure existing functionality remained stable across multiple application modules.
- Contributed to automation testing by creating and executing automated test scenarios for frequently used and regression-critical workflows.
- Collaborated with developers, designers, and other stakeholders to reproduce, prioritize, retest, and close reported defects.
- Participated in Agile ceremonies, sprint testing activities, defect discussions, and release validation across 14 sprints.

QA Trainee — **Kodnest Technologies Private Limited**

Bangalore — May 2025 – Dec 2025

- Learned and practiced software testing fundamentals, SDLC/STLC concepts, Agile methodology, and software quality assurance processes.

- Prepared and executed test cases for functional, UI, regression, and validation testing scenarios.
- Built foundational knowledge of Selenium WebDriver and web automation testing concepts.
- Practiced defect identification, documentation, test execution, and basic automation workflows.
- Gained hands-on exposure to API testing concepts using Postman and REST APIs.
- Practiced SQL fundamentals for basic application data validation and verification.

QA Freelancer **IndiaMART InterMESH**

Remote — Oct 2024 – Feb 2025

- Prepared and executed test cases for functional and regression testing of web application workflows.
- Performed functional, UI, responsive, cross-browser, and end-to-end testing to validate application quality and user experience.
- Identified, documented, and tracked software defects with clear reproduction steps, expected results, and actual results.
- Coordinated with production teams through email and calls to communicate reproducible issues and follow up on defect resolution.
- Retested resolved defects and performed regression testing to verify application stability after fixes.
- Performed responsive testing across multiple devices and browsers to identify UI and compatibility issues.

PROJECTS

ShopEase – E-Commerce Web Application

- Tested product search, shopping cart, checkout, and payment gateway workflows.
- Reported 20+ UI/UX bugs and major functional defects during checkout with detailed reproduction steps and supporting evidence.
- Performed cross-browser testing and validated compatibility across different browsers and screen sizes.
- Conducted end-to-end testing of major shopping workflows from product selection through checkout.

EduTrack – Online Admission Portal

- Performed end-to-end functional, UI, validation, and boundary-value testing across admission workflows.
- Designed and executed 80+ test cases covering login, forms, field validation, and user workflows.
- Identified functional and UI issues and documented defects with clear expected and actual results.

API & DATA TESTING

- Performed REST API testing using Postman, including request methods, headers, authentication, status codes, JSON payloads, and error responses.
- Practiced CRUD API validation including Create, Update, Fetch, and Delete operations.
- Used SQL fundamentals for validating and verifying application data.

EDUCATION

Master of Computer Applications (MCA) **2022 – 2024**
Graphic Era University, Dehradun

Bachelor of Computer Applications (BCA) **2018 – 2021**
Magadh University, Gaya

KEY ACHIEVEMENTS

- Identified and reported 1,500+ defects across frontend, backend, UI/UX, and Figma design validation over 14 Agile sprints.
- Performed both manual and automation testing for a healthcare application across multiple modules and workflows.
- Executed 80+ detailed test cases covering critical application workflows and user scenarios.
- Identified and reported 20+ UI/UX and functional defects across project testing activities.
- Performed systematic cross-browser and responsive testing to identify compatibility and usability issues.
